Amendment. Dated July 7, 2009
Reply to Office action of May 11, 2009

Reply to Office action of May 11, 2009 Attorney Docket No. 103580.00025/2002P10176

Remarks

As stated above, Applicants appreciate the Examiner's thorough examination of the

subject application and request reexamination and reconsideration of the subject application in

view of the preceding amendments and the following remarks.

As of the office action of May 11, 2009, claims 1-5 were pending in the subject

application, of which claims 1 and 3 are independent claims. With this response applicants have

amended claims 1-5, and amended paragraphs  $41\ \text{and}\ 70\ \text{of}$  the specification to correct

typographical errors.

A. Objection to Drawings

The Examiner objected to the drawings because "the drawings are hand-drawn, or have

hand-written remarks, and/or are blurry and hard to read." Office Action at p. 2. The Examiner

requested corrected drawings. However, in a telephone conversation between the Examiner and

Applicants' representative, on June 17, 2009, the Examiner stated that the drawings submitted in

the application on Aug. 9, 2004 are acceptable for prosecution and that no corrected drawings are

necessary. Accordingly, Applicants respectfully request withdrawal of the objection to the

drawings.

B. Rejections under 35 U.S.C. § 101

The Examiner rejected claims 1-5 under 35 U.S.C. § 101. Office Action at p. 3. The

Examiner characterized claims 1-5 as process claims and stated that "the claim language does not

include the required tie [to a particular machine] or transformation [of underlying subject matter]

and is thus directed to non-statutory subject matter." Id. The Examiner also stated that the term

"information systems" in the claims is broad and "does not necessarily implicate either a

computer system or another machine." Id.

103580 00025/2002P10176 Attorney Docket No.

In response, Applicants have amended the claims. Independent claims 1 and 3 now include a Beauregard-style preamble and also recite "displaying a user interface on a computer

display . . . " The specification supports the amendments. See e.g. Subject Application at FIG. 1

and ¶¶ 30-31. Applicant contends that these amendments tie the claimed elements to a particular

machine because they include and recite specific hardware elements. Accordingly, Applicants

respectfully request withdrawal of the § 101 rejections of independent claims 1 and 3, and also

claims 2 and 4-5 because they are dependent upon claims 1 and 3, respectively.

C. Rejections under 35 U.S.C. § 102

The Examiner rejected claims 1-5 under 35 U.S.C. § 102(e) over U.S. Patent Application

Publication 2002/0184191 ("Marpe"). Office Action at p. 4. In response, the Applicants have

amended claims 1 and 3, the independent claims, which now recite in part:

wherein the user interface includes a project management tab providing features to define a merger and acquisition project from a merger and acquisition template, the features including:

creating a task force and assigning team members to the task force;

generating a schedule for the task force to follow:

generating project proposals to be completed by the task force; and

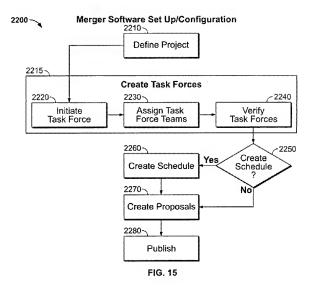

publishing information about the task force, schedule, and project proposals to

one or more stakeholders.

The amendment finds support in the subject application's written description and drawings. For

example, FIG. 15 contains the following flowchart:

Appl. No. 10/768,404
Amendment. Dated Reply to Office action of Attorney Docket No. 103580.00025/2002P10176

Other figures, such as figures 16-23, also depict user interface elements that support the amendments. The written specification also supports the amendments. See e.g. Subject Application ¶¶ 94-100.

Applicants contend that the claims are patentable under § 102 over Marpe because Marpe does not appear to include each and every element of the newly amended claims. For example, Marpe does not appear to include a feature for "creating a task force and assigning members to

the task force," "generating a schedule for the task force," "generating project proposals to be completed by the task force," and/or "publishing information about the task force" as claimed in the amended claims. Since *Marpe* does not appear to include at least these elements of the amended claims, Applicants respectfully contend that *Marpe* does not include each and every element of the claims.

To anticipate a claim under § 102, a reference must teach each and every element of the claim. See M.P.E.P. § 2131; Verdegaal Bros. v. Union Oil Co. of CA, 814 F.2d 628, 631 (Fed. Cir. 1987). Since Marpe does not appear to teach each and every element of the newly amended claims 1 and 3, Applicants respectfully request withdrawal of the § 102 rejection of claims 1 and 3. Applicants also request withdrawal of the § 102 rejection of claims 2 and 4-5 because they are dependent upon claims 1 and 3, respectively.

## D. Conclusion

In consideration of the amendments and foregoing discussion, the application is now believed to be in condition for allowance. Early allowance of the subject application is respectfully solicited. The Examiner is also invited to telephone Applicants' attorney (@ 617-305-2143) to facilitate prosecution of this application.
